Amazon Electric toothbrushes are a must in your arsenal of dental care. Not only are they more effective at removing plaque than hand toothbrushes, but you can easily replace your head every 2 months or so once the bristles wear out. Another advantage is that most of them come with a built-in timer so you know when to stop cleaning - yes guys should be cleaning for 2 minutes at least. While they may be a little more expensive, the initial investment is worth it for your teeth in the long run. Here are 5 of the best electric toothbrushes for a brighter and healthier smile. Advertising - Continue reading below 1. Oral-B White Pro 1000 This brush has a pressure sensor that stops the pulsation if it feels like you're brushing too hard. It also pulses every 30 seconds so you know when it's time to switch to another area of your mouth. 2. Fairywill Electric toothbrush 4-hour charge on this brush gives you up to 30 days of use, so you can bring it on a journey without worrying about battery life. It also comes with 5 different modes to suit different conditions of teeth and gums. 3. AquaSonic Black Series Ultra Whitening Toothbrush This brush helps dissolve stains on the surface of teeth to make them whiter and brighter. In addition, the massage mode helps to keep the gums in good shape. 4. Philips Sonicare ProtectiveClean 4100 This brush is great if you are dealing with braces, toppings, crowns or veneers. It also tracks how long you use your head brush, and how hard you've been brushing. When it's time to replace it, the light on the handle lets you know. 5. Goby Brush Kit Goby offers a subscription service for new brushes that deliver to your door as often as you would like (standard time every 3 months). The built-in timer pulses every 30 seconds to make sure you are brushing all areas of your mouth. And cleaning just before lunch because you can't wait until bedtime. Or maybe it was just me a couple of weeks ago when I got Philips DiamondClean, after my dentist told me it was the only toothbrush anyone should use. I tend to agree. Here's why. 1. Chic color options: pink for ruffled powder rooms, matte black for modern, minimalist bathrooms and white for your sunny At home. 2. The charger is a glass cup, which means you don't have to worry about wiping the bottom of your toothbrush to avoid that build-up that happens on electric stands. Brilliant. 3. My mouth never felt cleaner and my teeth never looked whiter. This toothbrush is a brush A similarly priced one I used to feel like a brush doll-with five modes and a high, vibrating intensity, it's a serious nutrition tool. You've heard time and time again from your dentist to brush for two minutes twice a day and floss on a regular to keep your teeth in tip-top condition, but let's face it on some (lazy) nights that's just easier said than done. That's where an electric toothbrush can make all the difference. These excellent devices fluctuate on their own, so there's really no manual work needed, which makes the daily commitment to oral grooming routine much easier. And not only that, electric toothbrushes offer a deeper cleaner for a whiter smile, and they're also a much better look at your bathroom counter than a conventional of toothbrush. You can find electric toothbrushes at a variety of price points, from cheaper (yet fully effective) versions of the pharmacy to more expensive, high-tech options that connect to your phone and evaluate your cleaning skills. (Yes, they are pretty much like having a dentist on call). Without further ado, here are our picks of the best electric toothbrushes you can buy today. This electric toothbrush has everything you need to keep your smile looking your best, all at an affordable price. Features include a two-minute timer (because let's be real, we all think we brushed for two minutes when we really only did it like, 30 seconds) and about a week's battery charge. The round head of the brush rotates, moves back and forth, and pulses to get rid of plaque buildup along the gum line. There is even a sensor that detects when you clean too hard. And you don't have to shell out a ton for new brush heads, as this electric toothbrush is compatible with a wide variety. (Just FYI: You have to replace the head brush every three months.) You can get in on an electric toothbrush fun less than the cost of lunch with this affordable pick. The oscillating head of the brush rotates to clear between the teeth, while some bristles move up and down to tackle plaque and massage the gums (ahhhhh). The brush is actually changing the color (from blue to white), so that Will know exactly when it's time to replace the head brush, and the handle is designed to fit just right in your hand. Also, because it runs on battery life, you don't have to worry about bulky chargers. Consider this Rolis Royce electric toothbrushes. It comes with seven brush brushes which are specifically designed to control plaques, gum care, and bleaching, as well as tongue brushes. The head of the brush is automatically paired with a coordinating brush mode (there are five: clean, deep cleaning, bleaching, gum health and language care). Pair this electric toothbrush with the Philips Sonicare app to get real-time feedback on how effectively you brush and see if you've missed any stains. The app also tracks how long you've used a head brush and automatically orders you new when it's time. Honestly, have you seen a prettier toothbrush? This shiny copper metal electric toothbrush isn't just cute - it's perfect for traveling. It has a sleek, slim design that fits easily inside your hand or purse, so you can brush your mouth wherever you are in the world. It also comes with a holder that sticks to the mirror for convenience and you can use the holder as a cover during the journey. The kwip is powered by a single AAA battery and cleans its teeth with sound vibrations. It has a two-minute timer and will pause every 30 seconds so you know it's time to move to the other part of your mouth. If you sign up for a subscription through the brand, you'll get a new head brush and a new battery every three months. Bleaching treatments can drain your wallet and sometimes they are even a little uncomfortable. So, decorate your smile at home with this electric toothbrush designed specifically for whitening the look of your teeth. The bleaching mode dissolves surface spots, while the massage regime improves the health of the gums. Proof in science: This electric toothbrush has a powerful engine (it produces 40,000 vibrations per minute!) and comes with eight brush heads that have been designed by engineers to really get the job done. Retreating gums are a sign of gum disease (which is actually quite common). If you experience receding gums, it is important that you brush your teeth gently, and this electric toothbrush is designed with gums in mind. The built-in pressure sensor tells you if you're brushing too hard, and the toothbrush comes with a special gum care regimen that gently removes plaque between your teeth and massages your gums to help keep them as healthy as it can be. What's more, the brush head features tightly packed bristles that are extra-gentle on the gums. If you have sensitive teeth, then you know that being gentle is key. This electric toothbrush has a special sensitive mode (and a sensitive head brush) so you can get your mouth all squeaky clean without damaging your teeth in the process. Other modes include daily cleaning, gum care, bleaching, deep brushing and tongue cleaning. The round headbrush and angular bristles provide a deep Every time, and the app doles out oral help tips while you're cleaning, so you can customize your technique for the best clean as you go. So, one of the drawbacks of an electric toothbrush is that you have to charge it in order to make it rotate and pulsate. But this electric toothbrush takes things things off a completely different level when it comes to battery life. Just four hours of charging through a USB cord (super handy) gives you a whopping 30 days of battery life. On top of this, this electric toothbrush is extremely light, is waterproof, has a two-minute timer, and features wavy bristles made for careful cleaning of gums and areas that are usually difficult to reach. When brushing your teeth, show your tongue some love for fresh breath. This electric toothbrush has six speed modes, including one for language care (other modes include gum care, sensitivity and bleaching). Download the Oral-B app and get a programmed routine to help you reach your goal of getting a fresh breath. Customers rave about the quiet motor of this electric toothbrush. Did you come home late? Brush your teeth without risking waking up your S.O. or roommate. The built-in pressure sensor tells you if you brush too hard, and the timer lets you know when you've reached the two-minute mark. There's even a feature that will track how long you've used a head brush, so you'll be fully aware when you need to swap it for a new one. Sometimes you rush, which means washing your face and brushing your teeth when you are in the shower. This electric toothbrush, which comes in three oh-so fun colors (cobalt blue, mint and pink), is waterproof, so you can use it in the shower without fear of ruining it. It's not the only cool thing about this toothbrush: It's made of silicone, with bristles that inhibit bacterial growth much more than traditional nylon bristles do. Customers also like how soft bristles are on their gums. Fact: Flossing isn't exactly the most fun event out there. And yet it's still a necessity if you want a dazzling, healthy smile. This water flossing is perfect for those of us who hate flossing (or have trouble doing so thanks to braces or other dental work). It uses the pressure of a jet of dental water and pulsation to get rid of plaque between your teeth and below the gum line that your toothbrush and regular floss simply fail to reach. The tip rotates 360 degrees so you can reach even the furthest corners of your mouth. Its tank holds 22 ounces of water and can be placed in a dishwasher for easy cleaning.
